VENDORS EYE · vendorseye.com

Enterprise offer sheet

AI-provider change monitoring, evidence-backed impact analysis, recommendations, and workspace review.

Custom pricing — quoted individually

Enterprise is an inquiry-led, custom arrangement. There is no published fixed price or unlimited-use promise. Requirements beyond the standard Team offer are assessed for feasibility before a written quote is provided.

Standard offers for comparison

Offer	Price (USD)	Coverage
Free Starter	Free	1 workspace, up to 2 providers, weekly digest, 30-day visible history; no urgent email or Slack alerts.
Pro	$19/month or $199/year	1 workspace, all 5 current providers, weekly digest, urgent email and authorized Slack alerts, 90-day visible history.
Team	$39/month or $399/year	Up to 2 dedicated workspaces, all 5 current providers in each, separate profiles, review queues and alert settings, 365-day visible history.

Current providers: OpenAI, Anthropic, Google Cloud, AWS Bedrock, and Azure OpenAI. All standard offers include evidence-backed analysis and recommendations. Visible history is a product-access window, not a data-deletion commitment.

What determines an Enterprise quote

- Requested workspace count, team structure, and intended usage.
- Provider interests and source-coverage requirements, subject to availability and assessment.
- Review, notification, history, support, and security requirements.
- Implementation feasibility, any separately agreed work, and the subscription term.

These are scoping topics, not promises that custom integrations, advanced approvals, a full activity log, SSO, unlimited capacity, or an SLA are currently available or included.

Written scope and commercial terms

A quote must specify the price, currency, billing interval, workspace and provider limits, included deliverables, any setup charges, tax treatment, renewal terms, cancellation and refund terms, and any agreed support commitments. No subscription or payment obligation is created by submitting an inquiry.

Purchase availability: Paid subscriptions are not open for purchase yet. No payment is collected through the pricing page or Enterprise inquiry form. When purchases are enabled, applicable taxes and renewal terms will be disclosed before payment; Paddle will process supported purchases as merchant of record.

Request a scope review: contact.vendorseye@tuta.io
Include your organization, team size, required workspaces, provider interests, target timeline, and requirements.
